

Introduction to Hierarchical Bayesian Analysis for Ecological Data using WinBUGS

June 29-30th 2014, Montpellier

Eric PARENT

AgroParisTech

UMR Applied Mathematics and Informatics

`eric.parent@agroparistech.fr`

Etienne RIVOT

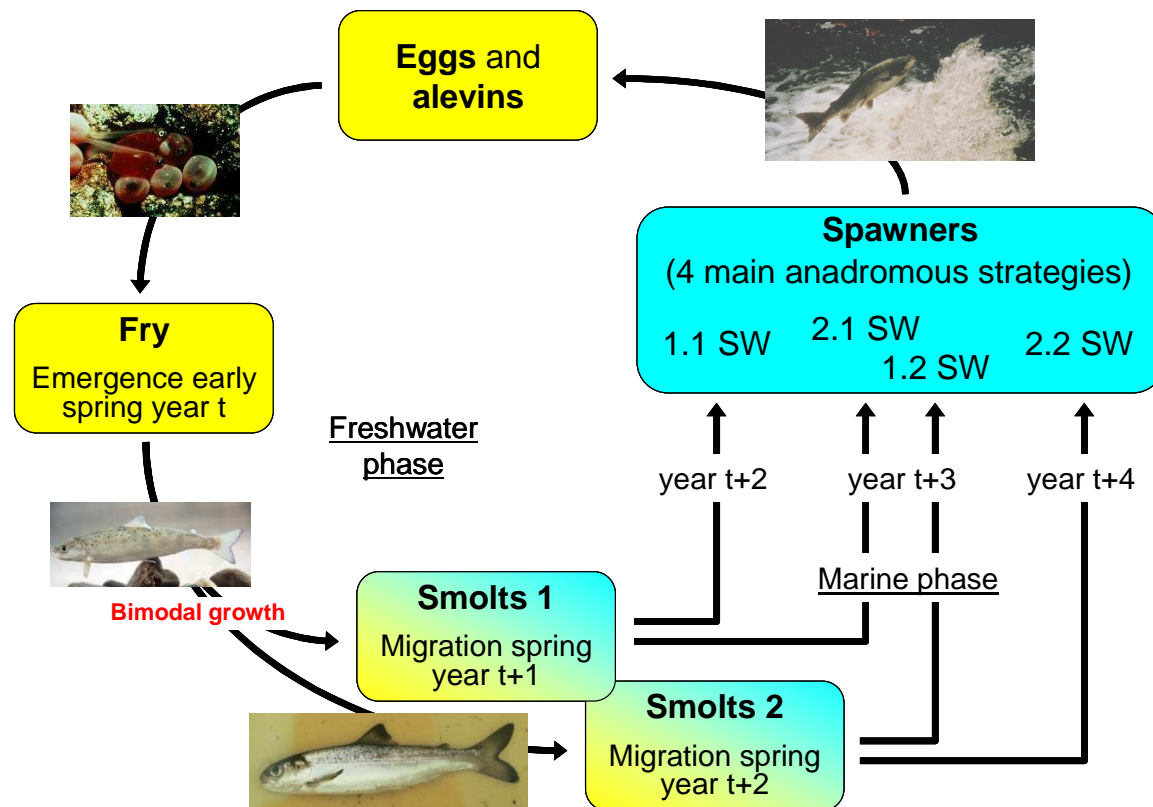

Agrocampus Ouest, University of Brittany

UMR Ecology and Ecosystem Health, Fisheries Ecology group

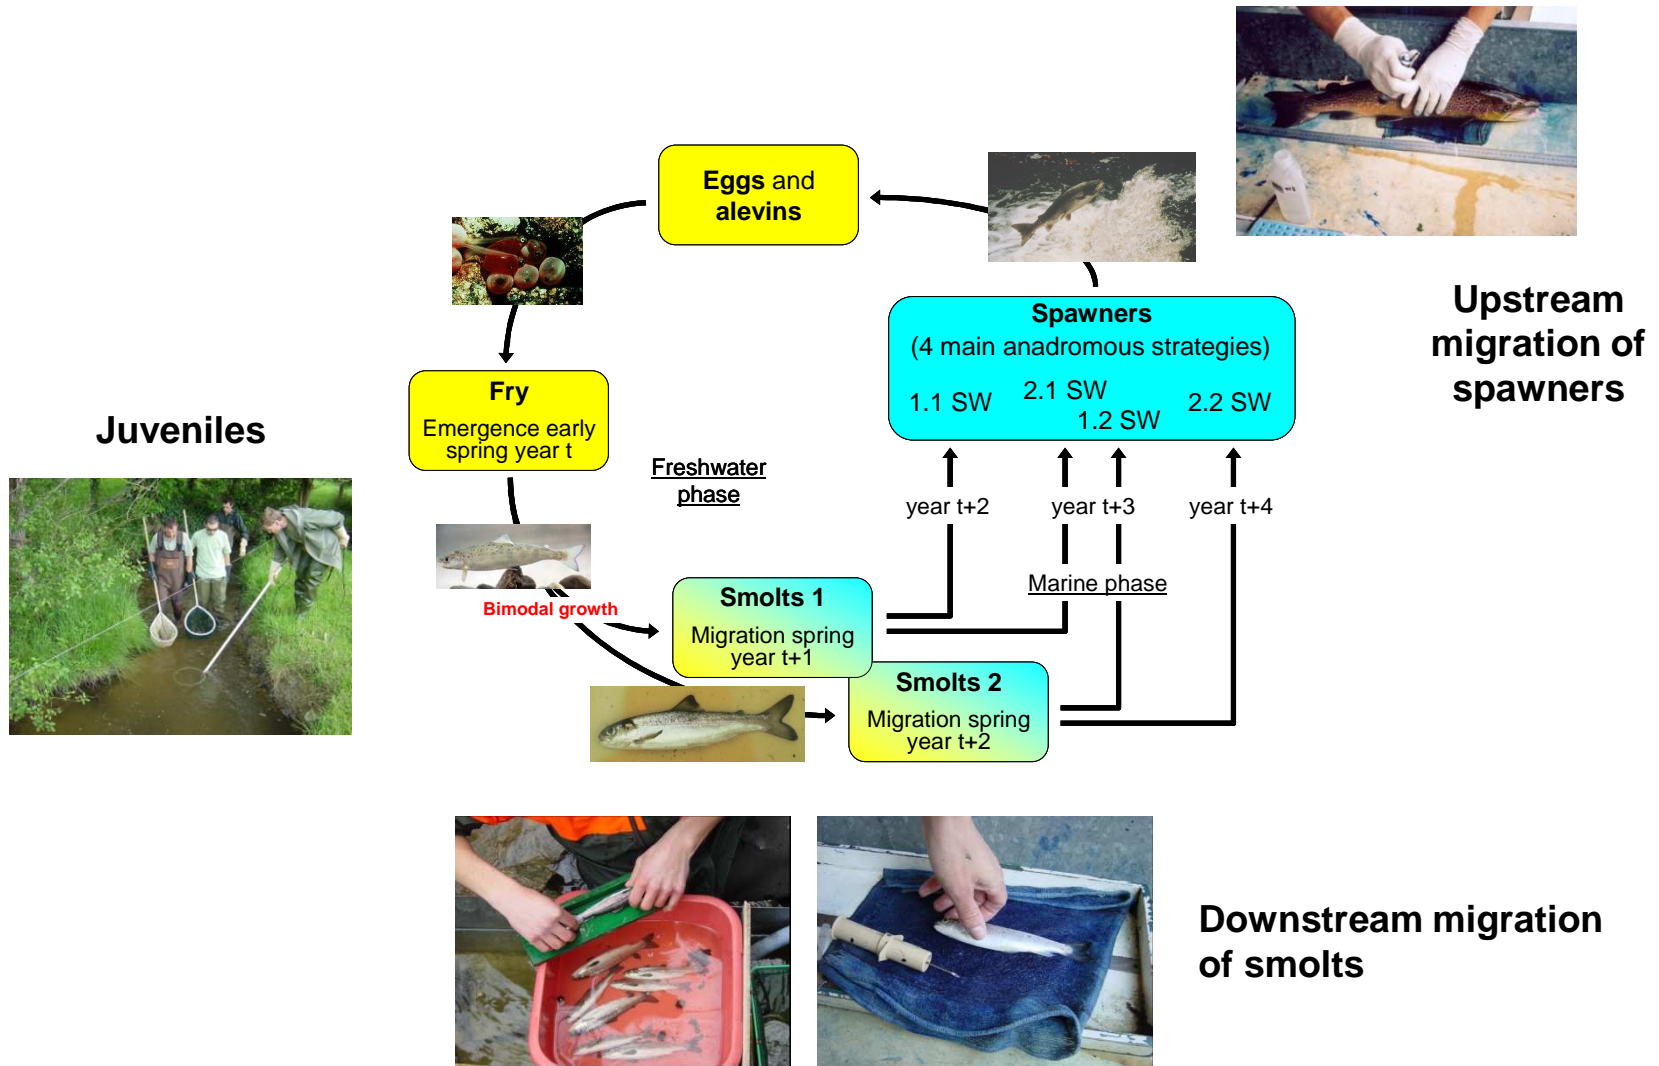

`etienne.rivot@agrocampus-ouest.fr`

**Bayesian modelling
of capture-mark-recapture experiments
to estimate the smolts (and adults) runs**

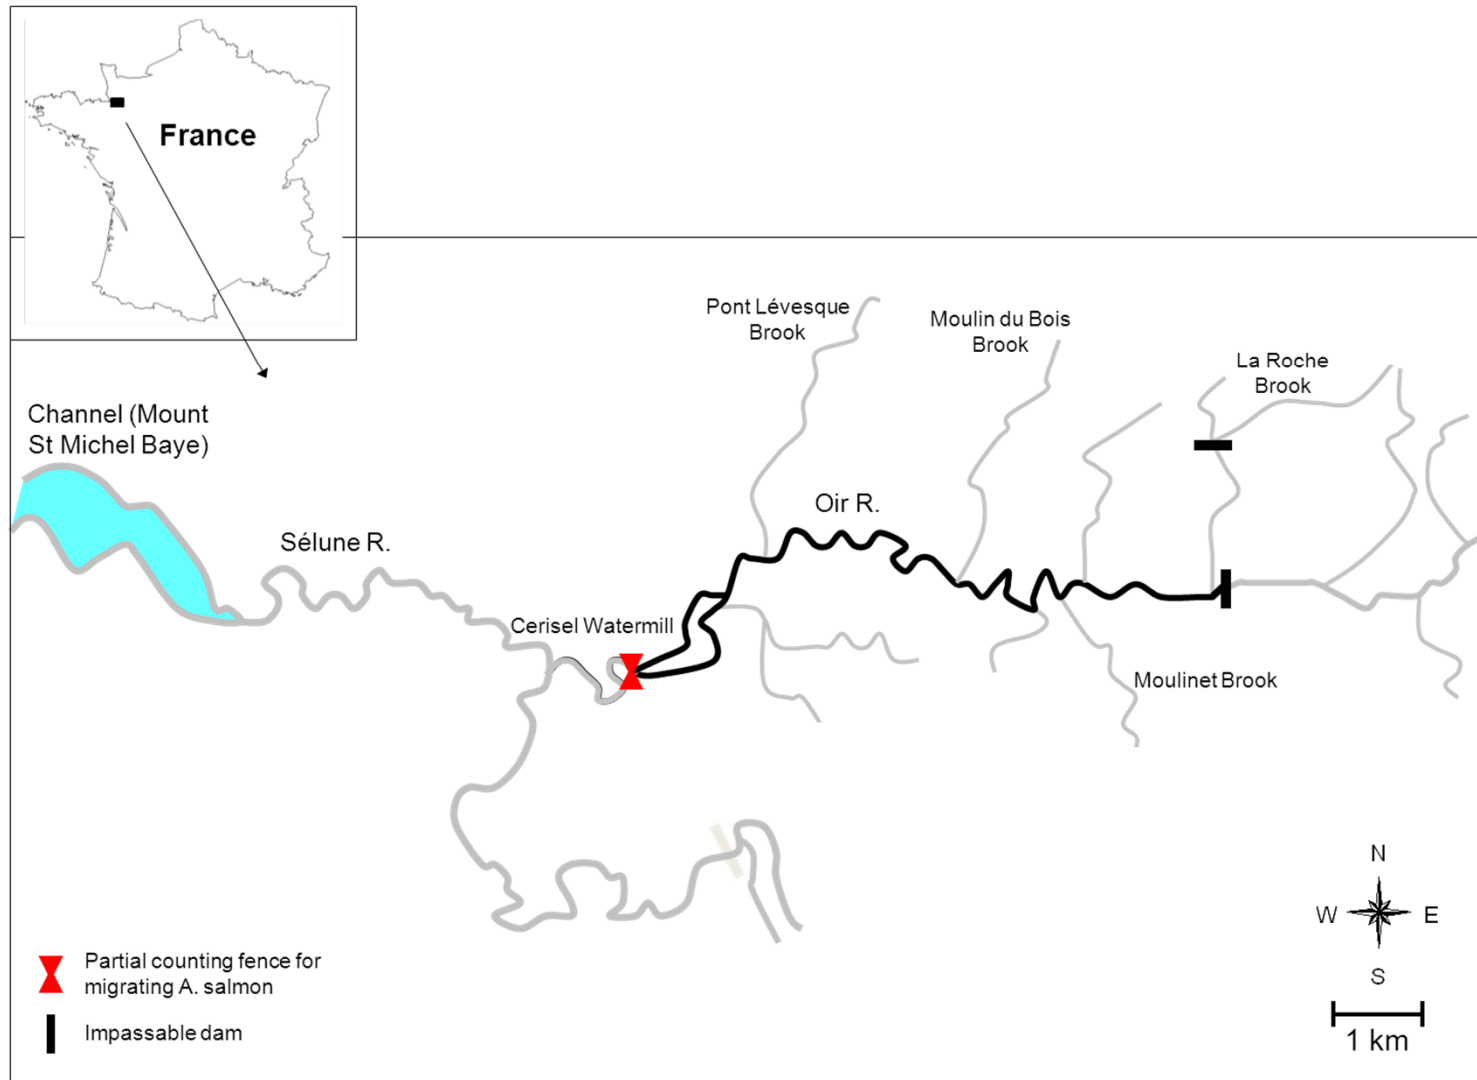

Atlantic salmon life cycle (In France)

Field surveys

The Oir river

The trapping facility

CMR for downstream migrating smolts

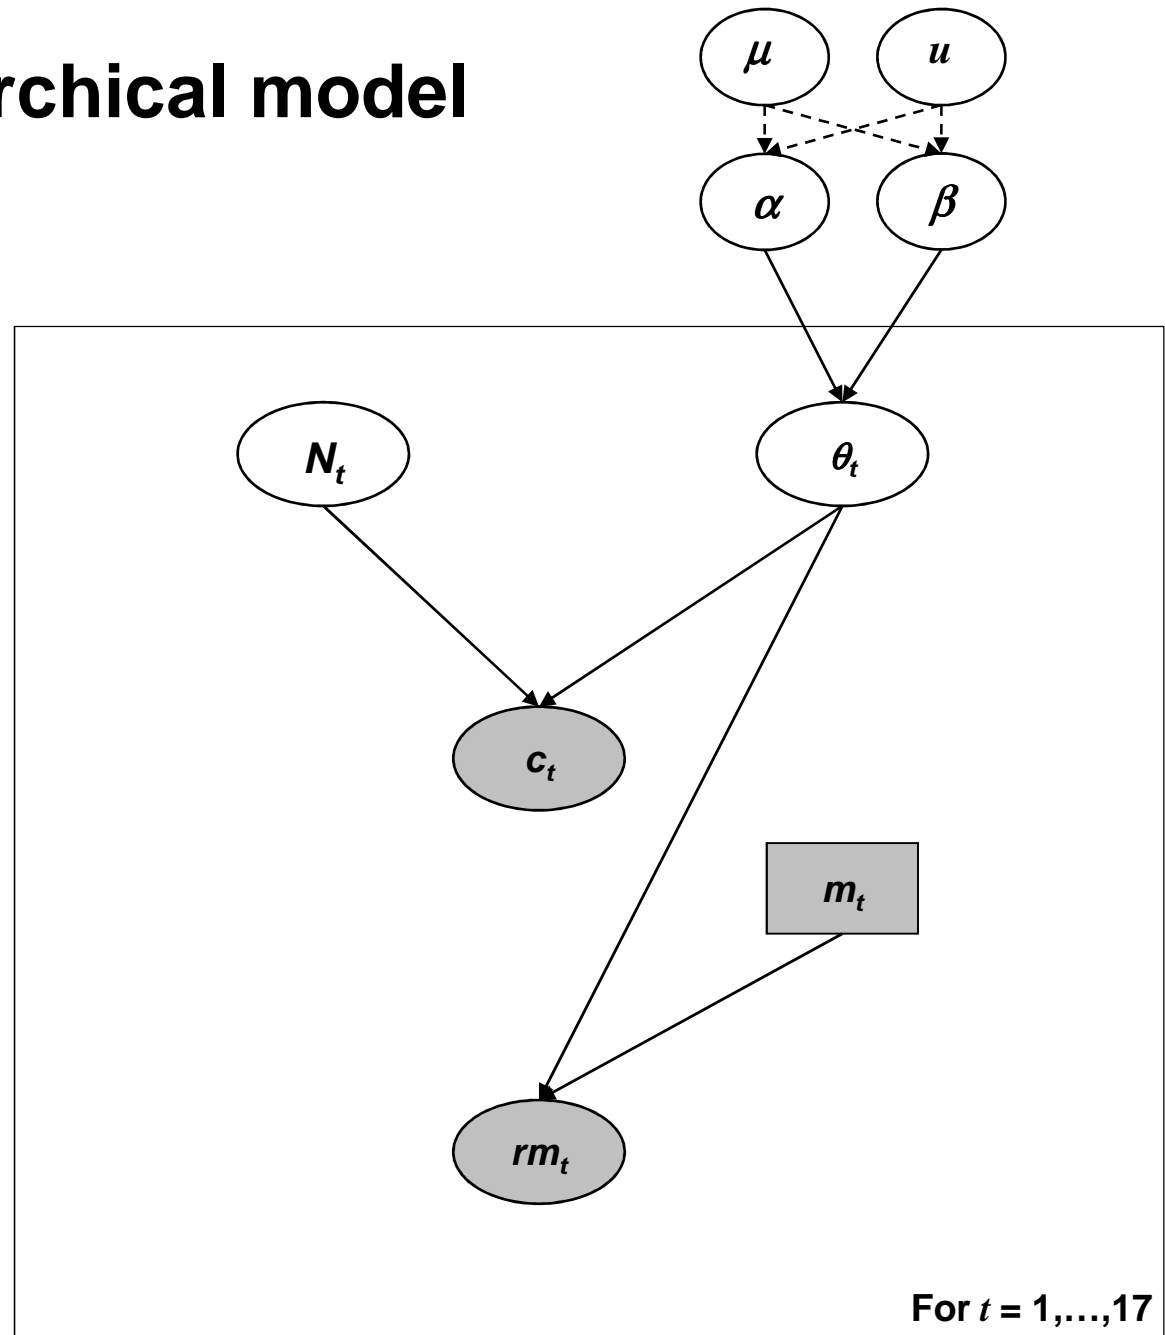

Data

Exp	Migration year	c	m	rm	p 1+	Q (m3 / sec)
1	1986	887	135	91	0.956	6.18
2	1987	283	31	24	0.516	4.19
3	1988	307	59	43	0.917	3.12
4	1989	553	65	43	0.895	4.13
5	1990	746	38	35	0.949	1.81
6	1991	151	35	27	0.669	5.45
7	1992	580	50	43	0.984	1.68
8	1993	209	26	24	0.818	3.25
9	1994	329	17	10	0.982	4.77
10	1995	618	63	NA	0.875	3.17
11	1996	767	76	NA	0.892	3.38
12	1997	205	63	31	0.907	5.29
13	1998	511	91	44	0.857	6.43
14	1999	195	59	45	0.221	3.40
15	2000	1849	300	232	0.992	5.04
16	2001	688	264	123	0.924	7.86
17	2002	1919	442	352	0.833	2.71
18	2003	844	326	222	0.581	4.42
